EXPERIENCE

Enzy May 2025–Present
AI/ML Engineer Lehi, UT

- Shipped an analytics and reporting assistant using Python, LangGraph, and Gemini models on AWS Fargate; adopted by over 50% of the customer base
- Built LangSmith evaluation suites for chat, insights, and automations with 178 test cases and 30+ evaluators; used results to improve token efficiency, reduce hallucinations, and catch regressions
- Enabled customers to search uploaded videos by meaning using Whisper transcription and transcript embeddings stored in PostgreSQL
- Designed a single-collection MongoDB schema and indexing strategy; migrated MySQL data using embedded documents and \$lookup patterns, reducing compute cost by over 60% and making large analytical queries 7–9× faster

Brigham Young University Department of Computer Science Jan 2024–Apr 2025
Teaching Assistant for Database Design Provo, UT

- Taught database design, SQL query optimization, and NoSQL concepts to 80+ undergraduates; created database design assignments and hands-on NoSQL labs

Marching Order May 2024–Aug 2024
Software Engineer Remote

- Rebuilt 20+ legacy features using C# and Angular as part of a migration to .NET 8, preserving backward compatibility for existing customers
- Added automated tests for refactored components, reaching 90% coverage and reducing regression bugs by 75%

TECHNICAL SKILLS

Languages: Python, C#, Java, SQL

AI/ML: PyTorch, Hugging Face, LLMs, RAG, LoRA/QLoRA fine-tuning, LangChain, LangGraph, LangSmith, agent evaluation, NLP, MLOps

Data & Infrastructure: MySQL, PostgreSQL, MongoDB, Redis, AWS Fargate, Docker, Linux, Bash, Git

Web: .NET, Angular

EDUCATION

Brigham Young University Provo, UT
Master of Science in Computer Science Apr 2026

- Master's project: combined QLoRA fine-tuning with example retrieval for Text-to-SQL over an undocumented ~8,000-table enterprise schema, improving execution accuracy from 4.4% to 17.4% against a retrieval-only baseline
- Compared fine-tuning, retrieval, and hybrid LLM architectures using training and evaluation sets built from 26,500+ queries written by production data engineers

Bachelor of Science in Computer Science Apr 2024
BYU Academic Scholarship; Dean's List 2023

PUBLICATIONS

- Spencer Young, **Riley Sinema**, Cole Edgren, Andrew Hall, Nathan Dong, Porter Jenkins. "Assessing the Probabilistic Fit of Neural Regressors via Conditional Congruence." *ECAI*, Main Track, 2025. arXiv:2405.12412
Ran experiments and contributed to the manuscript draft and reviewer rebuttals.
